

9th Grade Geometry

Course Description:

This course is designed to give students a foundation in basic Geometry. It will cover an overview of Euclidean and Cartesian Geometry. The foundation for this course is Logic and students will be expected to review some of the logical processes learned in Logic class.

Course Purpose:

Geometry is a required class for all Heritage students. It is logical and spatial and will give students a slightly different mathematical foundation than does Algebra.

Textbook:

Geometry, Jurgensen, Brown, and Jugensen

Outline of Course Content:

First Semester: Chapter 1 through 4.

Second Semester: Chapters 5 through 8.
